## Recreational Trails

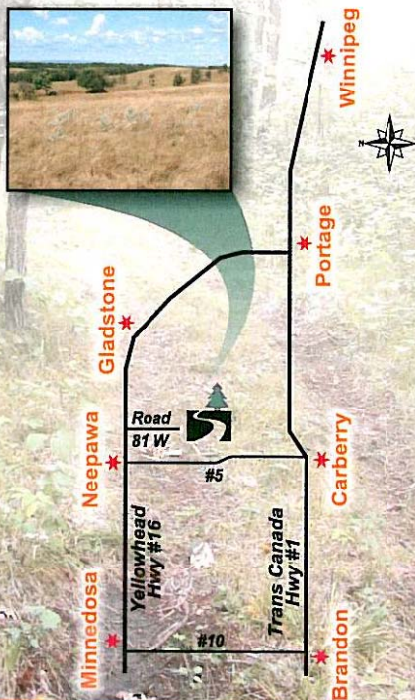

### TAKE A HIKE OR RIDE A BIKE

The Trails are open anytime you want to hike, bike, read, sketch, think or take a unique picture.

The Trails have various lengths and a variety of terrain.

The Trail Head is located in the parking lot:

10 km east of Neepawa  
(or 27 km west of Gladstone)  
and 5 km south on Road 81 W

The Langford Recreational Trail System situated in the Hummerston Unit of the Whitemud Watershed Wildlife Management Area contains a

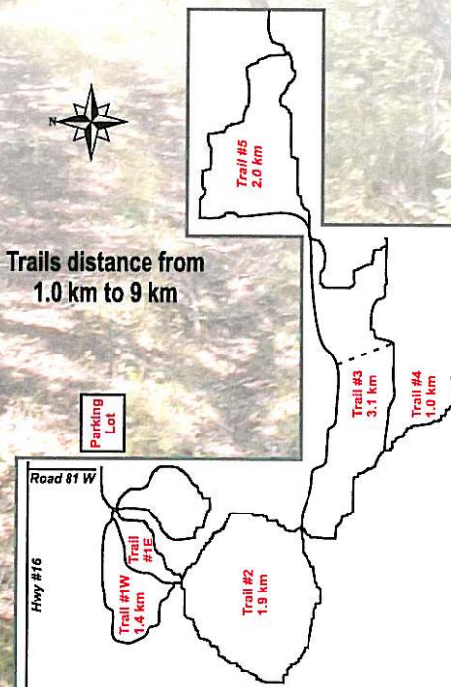

network of grass surfaced trails that will provide enjoyment for all ages and abilities. Two trails are relatively flat while the rest pass over rolling hills of various heights. They are part of the Upper Assiniboine Delta which originally

emptied into the ancient glacial Lake Agassiz. The hills are sand dunes covered with a variety of vegetation. A unique Tamarack Bog runs along the southern boundary of this area. Visitors will experience a variety of flora and fauna while exploring the trails.

Trails distance from  
1.0 km to 9 km
