# Be Water Smart!

As we all know - we are in a time of drought.

We ask that all residents do their part in an effort to conserve water.

You'll also lower your water bill!

## How Much Water Do We Use?

# Play your part, be water smart!

## Wise Water Use

**Water your yard and outdoor plants early or late in the day to reduce evaporation**

**Take shorter showers - five minutes or less is best.**

**Get an Energy Star labeled washing machine. Wash only full loads.**

**Put faucet aerators on sink faucets.**

**Install new toilets that use less than 1.6 gallons per flush.**

**Use plants that require less water.**

**Use low flow showerhead.**

**Use a shut-off nozzle on your hose.**

**Mulch around plants to hold water in the soil.**

**Turn off the water while soaping hands and brushing teeth.**

**Turn off sink faucet while scrubbing dishes and pots.**

**Use a broom, not a hose, to clean driveways and walkways.**

**Save it, or do without it!**
