SPRING MOSQUITO PREVENTION

Wondering what you can do to help prevent mosquitos?

Eliminate Standing Water: Mosquitoes breed in stagnant water, so check your property regularly for areas where water can accumulate, like in plant saucers, clogged gutters, or old tires. Empty or change water in bird baths, fountains, and pet water bowls weekly.

Maintain Your Lawn and Garden: Trim tall grass, weeds, and shrubs where mosquitoes like to hide during the day. Keeping your lawn neat and well-maintained reduces mosquito habitats.
